ACTIVE PEEL SYSTEM

with *Extremozyme*® Technology

AGE-DEFYING, EXFOLIATING, REJUVENATING

BENEFITS

- Reduces the appearance of fine lines, wrinkles, and pore size
- Powerful, yet gently resurfaces the skin
- Improves skin tone, texture, and smoothness
- Provides rapid and long-term results
- Supports collagen and elastin production
- Improves overall health and integrity of the skin

The clinically advanced botanically based Active Peel System is a powerful yet gentle, fast-acting two-step treatment designed to resurface and polish the skin while providing hydration, rejuvenation, and antioxidant protection. Designed to use every other day, this complete skin treatment produces a cool tingling sensation upon application as it activates. This well-balanced system helps to improve the appearance of skin tone and texture, resulting in a smooth, hydrated, and more youthful-looking complexion.

Step 1 is designed to provide controlled exfoliation, featuring a proprietary combination of powerful yet gentle botanical acids combined with soothing, nurturing botanical extracts. Step 2 provides hydration and rejuvenation, featuring our proprietary botanical Extremozyme technology and Copper Tripeptide-1 combined with soothing active botanicals.

DESCRIPTION Step 1: Colorless to straw serum soaked in towelettes Step 2: Straw to yellow serum soaked in towelettes

RETAIL SIZE 2.9 mL e 0.098 fl. oz. each pad

DOSAGE One peel system per application

INDICATIONS

- All skin types
- Gentle, but powerful solution for sensitive skin
- Blemish-prone skin
- Large or congested pores
- Rough skin texture
- Aging skin

APPLICATION

Recommended for use every other day, preferably in the evening. After cleansing, apply Step 1 over entire face and neck; leave on for three minutes (do not rinse), then apply Step 2 over same area, and leave on. Note: The Active Peel System Step 1 and Step 2 application will produce a cool tingling sensation; this is normal.

KEY INGREDIENT FEATURES

Step 1:

Saccharum Officinarum (Sugarcane) Extract 8.0%
Desquamation agent that encourages exfoliation of stratum corneum.

Mixed Fruit Acid Extracts 6.0%

Natural fruit and sugar acids work to enhance desquamation and increase cellular turnover, smooth skin, and decrease fine lines and wrinkles while enabling deep penetration of ingredients.

Hamamelis Virginiana (Witch Hazel) Water 5.0%

Powerful anti-inflammatory agent that contains gallic acid and tannins helping protect against skin damage, fight acne, and soothe skin.

Salix Alba (Willow) Bark Extract (Source of Salicylic Acid) 3.0%

Encourages desquamation by "dissolving" intercellular "cement" with no inflammatory effects. Also deep cleans pores and removes debris within hair follicles.

Aloe Barbadensis Leaf Juice 2.0%

Anti-inflammatory agent promotes wound healing, collagen synthesis, and contains antimicrobial properties.

Step 2:

Extremozymes 7.0%

A proprietary combination of extremophilic enzymes, clinically proven to protect and repair fragile proteins and DNA components.

Pentylene Glycol (Sugarcane Derived Humectant) 3.0%

Sugarcane pulp derived glycol that adds hydration and product protection from nasty bacteria and has less impact on the environment due to its process.

Copper Tripeptide Growth Factor (Bioidentical) 5.0%

Copper Tripeptide-1 (bioidentical) has been clinically proven to stimulate the synthesis of collagen in skin fibroblasts, and increase accumulation of total proteins, glycosaminoglycans, and DNA in dermal wounds. The Copper Tripeptide-1 sequence is present in collagen and it is suggested that the Copper Tripeptide-1 is released after tissue injury. Copper Tripeptide-1 also increases synthesis of decorin – a small proteoglycan in the regulation of collagen synthesis, wound healing regulation, and anti-tumor defense.
